

### Grade One Assembly Presentation Work:

The Grade 1 Integrated topic for Term 2 has been Australian Animals. Each week the children have been investigating various elements of different Australian Animals such as their habitat, their food sources, their life cycles and any particularly amazing features that help them survive and thrive.

The students were given a homework project to complete on an Australian Animals of their choice. Each student made a poster outlining various features of their chosen animal as well as a diorama showing the animals unique habitat. The posters and dioramas from each student were fantastic and the Grade 1 teachers, Ms Souness, Ms Tomsic and Mr Gurney, have been incredibly impressed by the enthusiasm and learning shown by all students. Some examples of Australian Animals chosen for the projects included the Kangaroo, Koala, Echidna, Platypus and Dingo as well as the Eltham Copper Butterfly, the Angel Shark, the Tiger Snake and the Thorny Devil.  
Well done Grade 1 students.
