WHAT'S BEEN HAPPENING IN GRADE 3

In Term 3, Grade 3 students have been learning about 'Earth and Space'. As part of this topic, the Grade 3s went on an excursion to Scienceworks last Friday to learn about how the sun and earth interact to create day and night and the seasons. We also learnt that the earth is on a tilt which affects the way each country experiences the seasons. We learnt lots of interesting facts about the sun and moon. The students are fascinated about space and are really enjoying learning about the different planets in our solar system.

Celeste + Riley

- Did you know that the moon takes a month to go around the earth?
- Did you know the earth takes 1 year to go around the sun?
- Did you know the moon does not effect the night and day?
- Did you know the earth is on a tilt?
- In the north pole there is no day in winter and there is no night in summer?
- Did you know you can only see the

southern cross in Australia?

- 1,300,000 earths can go into the sun

Thank you

I really enjoyed the activities they had there e.g. jump test! I loved the planetarium!* I learned a lot!

By Sam A

SCIENCEWORKS

*The planetarium was awesome! I thought I was in real space. I loved playing in the race. I was very tired after a long day!

By Milly S

*I really enjoyed the Planetarium.
*I loved the jumping test! (:
*I learnt that the easiest Planet to see is Saturn.
*I liked the wheel chair racing.
*Sport science was cool
